

# MAINTAIN PIPE LINE TO NAVIGABLE WATERS OF THE MISSOURI

**The Great Kansas Independent Refinery Will Not Be Robbed by Criminal Rebates, but Will Occupy Independent Ground by Piping to a Great Waterway and Owning Steamboats and Steel Barges.**

**STOCK NOW SELLING FOR \$80 PER 1,000 SHARES CERTAIN TO ADVANCE TO \$750 PER 1,000 SHARES IN NEXT SIX MONTHS.**

**T**HIS great enterprise will immediately install Refinery No. 2 on the banks of navigable water close to Kansas City. Will own steamboats and barges and what oil it does not market to the millions of inhabitants in the two Kansas Cities, Omaha, Council Bluffs, St. Joseph, Leavenworth and other large cities close at hand, they will ship by water to the big cities from St. Paul to New Orleans and from St. Louis to Pittsburgh.

**W**HEN you join our band, now nearly two thousand strong, you practically secure an interest in two great refineries, over three hundred miles of pipe lines, thousands of barrels of tankage, dozens of tank cars, over twelve thousand acres of oil lands and hundreds of producing wells, and steamboats and oil barges to carry the refined oil to the markets of the world.

**R**EMITTANCES are coming in on every mail from California to North Carolina, from Mexico to Ontario and from Florida to New York. Popular approval is backing the Uncle Sam Company, men are working for it, papers are talking for it and, in fact, it is growing to a mountain of strength. It is the only formidable foe to Standard Oil oppression west of the Alleghenies. Money invested is not only sure to increase tenfold in solid values, but at the same time you will strike a blow for justice in the oil fields.

Refinery No. 2 on the Banks of Navigable Waters.

The most important move of a refinery company is to locate refineries and build pipe lines so that it can market oil without being held up by criminal rebates which are so hard to prove. The Uncle Sam Company is guarding against just such underhanded knockouts as these, and work will

soon be under way to lay the pipe line to navigable water. The plant will be located some time next week at some point between Holiday, Kas., and Kansas City. Our attorney is now negotiating for the right of way for the pipe line, and as soon as the first thirty miles are secured the company will at once commence laying pipe. The man who thinks the Uncle Sam Company

will not build Refinery No. 2 and connect it with a main pipe line over 150 miles long will spot his own pocket-book. The Uncle Sam Company does things. Some sixty days ago it advertised it would build a refinery at Cherryvale. Well, come down and you can see for yourself that it is fast accomplishing what it started. There are thousands upon thousands of dollars back of the Uncle Sam Company, and few people really realize its giant strength. And it is growing stronger every hour. If you want to help strike a blow for justice in the oil fields and at the same time tenfold your investment, send check or draft today for stock, before it advances to 15 cents per share. Things are moving down here, the Uncle Sam Company is the company of the hour and the stock you can buy now will not be offered long at 8 cents per share.

## Secures Four Thousand Additional Acres of Rich Oil and Gas Lands.

Within the last 24 hours four thousand acres of the choicest oil and gas properties in the Cherryvale and the Coffeyville oil fields have passed into the control of the Uncle Sam. These lands give the Uncle Sam control of nearly seven thousand acres and 74 producing wells. Two drilling rigs are now steadily at work. The Uncle Sam Company is hedging at every bend in the road. It will take the oil from a thousand feet under ground and carry it through the different stages until it will be burning in your lamp or under your furnace. By owning its own oil wells and with a pipe line and refinery on the banks of the navigable water of the great Mississippi system every man must admit that it is following along the lines of safe business methods and that profitable results are certain under these conditions. When you buy the stock you not only further the ends of justice in the oil fields, but invest where the investment is sure to pay tenfold. Can you afford to turn down an investment like this? If you delay long the stock will cost you more money, as there are nearly two thousand men directly interested in the final great success of this great company, and they are working with their friends and also doubling up their holdings. The very minute the pipe line reaches the refinery near Kansas City this stock will be in demand at close to par or \$1 per share. No investment in the world offers what this company offers, and there are men enough back of the company to guarantee a square deal and that is all that is necessary to make money in the refining of oil, for the profits are great. The Standard Oil oppression could not divide millions yearly in dividends, as is their history.

## Standard Oil Stock Sold One Time for \$400.00 Per Share. It Now Is Selling for \$600.00 Per Share and Is Paying Enormous Dividends.

The Uncle Sam Company is the only refinery company in the West today that offers protection to its stockholders by following certain methods that will bring great returns. The Standard Oil oppressors are like a Canebrake Indian. They will shoot a fellow to pieces after he is down and cannot help himself, but the enterprise that reaches out and secures a leverage in the markets of the world it leaves alone, for like any other coward, it does not dare to criminally fight a competitor unless it knows before it goes after its scalp that it can secure it. How can any organized band of plunderers do anything to hinder the onward march to grand success of the great Kansas Independent Refinery, when, within a radius of one hundred miles, it will have a friendly market for more oil than it can refine? On the other hand, it can, through its own steamboats, ship by water at very small extra cost refined oil to any point on the Mississippi or its tributary river fronts. Remember, the men who are behind the guns in the Uncle Sam Company are Kansans, and the kind of men who have grown up with poppers and grasshoppers and have met hardships before, and they will come pretty near taking care of themselves, even though they are up against a crafty, underhanded set. When you invest your money with this company you not only get on the right side of the oil troubles, but you are in line to realize big profits. Standard Oil stock one time sold for less than one-fifth of the present value or selling price. Take a lesson from the great advances on

that stock and secure a good sized block of stock in the Uncle Sam Company before it goes to ten times the present price.

## Money Talks—Best Proof That Refinery Stock Is in Good Demand.

There never was a company that investors rushed in their money for stock with such confidence of success. Never has a recent boom maintained in the central west where the subscriptions for stock were equal to the demand for the Uncle Sam stock. For the benefit of those who may think they will have all summer to join this great company, we will say that the net sales of stock for Thursday, April 20, were \$3,000; paid in cash, \$1,000. On Friday, net sales cash, \$5,000; cash paid, \$1,000. Now the company is just the company advertised. Men are working for it all over the United States. The sales on Thursday and Friday are not one-half of what they will be during some of the days in the next month. The man who thinks the Uncle Sam Company will not build the pipe line to the water front, and another refinery, simply shows that he is off in the upper story. People have confidence in the Uncle Sam Company. Money talks. Work will be crowded ahead with vim. Stock that is now selling for 8 cents per share will be in greater demand at 15 cents per share in six weeks than it is now at 8 cents. When you line up with this company you get a winner and you also join a band of determined men who are working for a square deal in the oil fields, and what is more, they are going to get it. The remittances mentioned did not come from one or two men, they represent sales on stock from 500 to 5,000 shares. These men will all sell stock, and they will sell it at a profit. The remittances mentioned did not come from one or two men, they represent sales on stock from 500 to 5,000 shares. These men will all sell stock, and they will sell it at a profit. The remittances mentioned did not come from one or two men, they represent sales on stock from 500 to 5,000 shares. These men will all sell stock, and they will sell it at a profit.

## Financial Condition of the Company.

Authorized capitalization, \$10,000,000. Par value of the stock is \$1 per share. Every share of stock draws the same amount of dividends as any other share. The company has in cash in its treasury and in gift-edged investments, payments and lands, oil wells, machinery, buildings and other assets, on a conservative basis, \$2,500,000 free of DEBT. There is in the treasury at this writing \$1,750,000 shares, which will be sold at 8 cents per share or higher. The chances are 10 to 1 that the last stock sold at 10 to 20 cents per share and any man can depend on close to \$1,500,000 back of this company in cash before the treasury stock is all sold. Now, just figure a moment for yourself. The company has no dead-end stock. Every share sold has been cash to the treasury. One refinery is as good as built. Nearly 7,000 acres of oil lands, with close to 100 oil wells, are owned or controlled by the company, and there have been 3,000 more wells. Money is pouring in at the above rate per day, and will increase. We can prove our statements as to remittances by our bank books. You will never be able to buy the stock cheaper than 8 cents, and any man knows as the work nears completion, the value increases and the price must advance. Better secure some of this stock while you can and reap a great reward by so doing. You can invest from \$80 to \$4,000 safely. The stock is non-assessable and there is no liability.

## Company Would Be Justified in Advancing the Stock to 20 Cents Per Share Right Now.

There are deals enough pending in the United States right now to sell all the balance of the stock of this company twice over. The very minute the pipe line to Kansas City is even over half way completed the stock will sell readily at 20 cents per share. The assets back of this stock and the bright future ahead would justify the company in advancing the stock to at least 20 cents per share. When you secure the stock at 8 cents you secure value received and then some.

## When You Buy This Stock You Are Securing an Interest in Practically Two Great Refineries, Over 12,000 Acres of Oil Lands, 300 Miles of Pipe Lines, Thousands of Barrels of Storage and Tank Cars and Steamboats.

When you buy the stock of this company you really secure an interest in a great deal more than is represented here. Every day additional machinery is being secured. Today men and teams have worked all day unloading part of the first big steel tank. It's just a question of weeks until men will be laying the pipe line to Kansas City and every day additional oil lands are going into the control of the Uncle Sam. Another fact you must bear in mind when you figure on buying this stock is that this company is well advertised, and through the best and most influential advertising mediums in the United States. Millions of people will read about this company. The company has stockholders all over the Southern States, as well as away up in New England. Also California and in the Dominion of Canada. Every stockholder is vitally interested in adding the company place the balance of the stock, for the quicker it is sold the faster the work will move. Now is the time for you to place your shoulder to the wheel—right now, before the stock advances out of your reach. Remember that while you read this announcement the telephone wires will be tickling their orders and that the mails will be loaded with letters ordering this stock. From one part of the United States to the other men will be all work, for the whole nation is interested in the welfare of Kansas in her fight against Standard Oil oppression and spoliation. The Uncle Sam Company offers a practical way for every man whose heart throbs for justice and a square deal, and who, at the same time, would like to place a few hundred dollars where the returns are certain to be large.

## The Germans of Kansas Are Falling in Line.

Through the assistance of some good friends of the Uncle Sam Company the Germans of Kansas are fast securing Uncle Sam stock. In fact there are enough Kansas Germans right now interested in the stock to control the German vote of Kansas. When a few Standard Oil henchmen try to sneak into the legislative halls of Kansas you will see the great advantage in the Uncle Sam Company having men back of the company in every voting precinct in the State. The present law must be maintained on the statute books and other good ones passed, and it is just such a company as the Uncle Sam that will wield a power when Standard Oil crooks in disguise, try to work their rabbit's foot on the people of Kansas. The Uncle Sam Company now has enough men interested so that it could put over one thousand men in Topeka in twenty-four hours if the interest of the company demanded it. This is another good reason why your

## Now Is the Time to Buy Your Stock.

For a Few More Days the Uncle Sam Co. Will Sell Treasury Stock as Follows:

500 Shares.....	\$40.00	2,500 Shares....	\$200.00
1,000 Shares.....	\$80.00	5,000 Shares....	\$400.00
1,500 Shares.....	\$120.00	10,000 Shares....	\$800.00
2,000 Shares.....	\$160.00		

The time to invest in a company is when that company is selling its ground-floor stock. When you buy stock in the Uncle Sam Company at \$80 per 1,000 shares, you pay no more than hundreds of other investors. The company is strong now, and is hourly growing stronger. By September 1st you will see this stock up close to the dollar mark. Why not help yourself, and also help this company, by remitting today for at least 1,000 shares of stock?

## INSTALLMENT OFFER GIVES EVERY MAN A CHANCE.

The Uncle Sam Company would rather have ten men go together and take one thousand shares each than to have a few men take a large amount of the stock. The company wants men who have a vote and who will stand by the company when it has criminal discrimination to contend with. Better see your friends and raise a club and take ten, fifteen or twenty thousand shares right now.

Subject to raise without notice, the company will sell stock as follows on installments:

500 shares, \$10 cash, with 5 monthly payments of \$8.	
1,000 shares, \$20 cash, with 5 monthly payments of \$16.	
2,000 shares, \$40 cash, with 5 monthly payments of \$32.	
3,000 shares, \$60 cash, with 5 monthly payments of \$48.	
4,000 shares, \$80 cash, with 5 monthly payments of \$64.	
5,000 shares, \$100 cash, with 5 monthly payments of \$80.	
10,000 shares, \$200 cash, with 5 monthly payments of \$160.	
20,000 shares, \$400 cash, with 5 monthly payments of \$320.	

money is safe in this company. Four or five capitalists could be downed by the Wall Street plunderers, but when you go up two or three thousand little fellows there will be something doing. No legislator will see out his constituents if there are even twenty-five determined men at his home, in the Sunflower State, to hold him in line when they go at matters as they usually do and as the independent refinery stockholders will.

Drastic measures will be necessary to down Standard Oil trouble, but that is what the Kansans know they will have to overcome.

## Pumping Station on the Kansas City Pipe Line Will Be Near Garnett, Kansas.

Long before the pipe line is completed to Kansas City, and, in fact, by the time it reaches the pumping station that will be located near Garnett, Kas., you will see investors rushing to secure this stock at even 20 cents per share. Why not get in on practically the ground floor now at 8 cents per share and secure the advantage of the great and increasing value that is sure to come?

## Maximum Freight Rate Law Passed in Kansas Is a Clincher in Favor of Both the Producer and Consumer of Oil; Other States Will Follow Soon.

It is no longer possible for railroads to go into oil business in Kansas with the Standard Oil oppressor and make the independent companies pay the oppressor's freight, as they have sand-bagged people in other States and are still doing. In Kansas today there is a maximum freight rate on oil which although reasonable will be made still lower when the next Legislature meets if not in a special session before two more years roll around. This same law in time will be passed in Missouri, Nebraska and Oklahoma and other States, for this law enables the people to secure their refined oil at reasonable prices. Why should the

the present price. The investment is safe. What more can any reasonable man expect?

## ANOTHER GREAT OILER

**Our Farmers' Field a Nine-Time Winner.**

Since setting this advertisement, and just as the press was ready for press, Secretary Tucker wired The World as follows: The Uncle Sam folks are surely in luck. "Cherryvale, Kas., April 22.—Undoubtedly the largest oil ever secured in Cherryvale field was drilled and completed this afternoon on the Nick Vender farm near the refinery. "This is Uncle Sam Refinery Farmers' Well No. 76. The well starts off at 150 barrels the first twenty-four hours, is high-grade oil, has forty-sev-

en feet rich pay oil sand and proves up over sixty additional sure locations in the Drinn Creek holdings of the Uncle Sam Refinery Company, and increased the value of refinery proved oil properties at least 50 per cent. "Here," the Pennsylvania driller, who has drilled in over thirty wells in the Cherryvale and other Kansas oil fields, says this well has the most pay oil sand of any producer he has ever completed, and he is a conservative, reliable driller, and knows what he is talking about.

—H. H. TUCKER, JR.

Every Banker, Every Lending Merchant, Doctor, and in Fact All Cherryvale, Is Backing the Uncle Sam Company With Their Cash.

When you buy stock in this great refinery company you pay no more for it than hundreds of other investors. In Cherryvale almost every leading man in the city owns stock in the company and is working for its grand success. They paid money for the stock, too. It was not given to them like some hot air bubbles do for the use of influential names. Another fact that speaks volumes for this company is that in the last three weeks over ten different bank presidents in Kansas have taken from five to ten thousand shares each. This company never publishes the names of investors, but only mentions this as a key to investors the men of means and experience in the financial world consider this stock a gift edge. This company will state further that it will back all the advertised statements of the company, so if you are a friend of the company and hear someone ridicule some statement in this ad, just tell him to put up some money and come to Cherryvale and the company will take pleasure in proving every advertised claim or statement.

## Cherryvale Refinery Will Supply the South and Southwest—Large Storage Stations Will Be Maintained at Winfield, Wichita and Topeka.

Three barrels of fuel oil are equal to one ton of coal, which cost the thrushers and the farmers in Western Kansas over \$5 per ton, while the big millers and the manufacturers of Wichita, Topeka and Winfield pay very high prices for coal, even when they buy in several car lots. The Uncle Sam Company, from its Cherryvale plant, will establish large stations for both refined and fuel oil for the south and southwest and especially in Winfield and Wichita. The company already has stockholders scattered all over the southern part of Kansas and the Territories. These men, as well as the citizens of Kansas, will be loyal to the oil from the great Kansas independent refinery. There will be stockholders enough to protect the market, and there is an antitrust law, which will also afford protection. These conditions every man must admit offer great advantages to the independent refiner. Now, take into consideration that Refinery No. 2, on the banks of the river, can reach the North and the Northwest with steamboat connections with all the big cities of the Mississippi system. Don't that look like the Uncle Sam Company meant business and that it will be a factor for years to come in the oil field? A few dollars invested now will continue to grow in value and pay your children dividends after you are gone. Just think this matter over seriously, and do it now. The company wants you with them; wants every man who desires to help himself and help this company secure grand success. Safe methods will be pursued at all times and if you buy stock now you get in at a price that will be more than doubled in the next sixty days. Now is the time to act.

## Personnel of the Company.

James Ingersoll, President.  
J. H. Ritchie, Vice President.  
H. H. Tucker, Jr., Secretary and Treasurer.

The above men promoted and placed in a disinterestedly backs the great Publishers Oil Company of Cherryvale. The great bulk of the stock of the Publishers' Company was sold from 5 to 12 cents per share. This stock steadily advanced until it reached 25 cents per share and was taken off the market, and you cannot buy today a single one of the above men today even at \$1.25 per share.

## HOW TO SEND MONEY

Make your checks, drafts or money orders payable to the Uncle Sam Company or to H. H. Tucker, Jr., secretary. Write your name plainly, tell us how or to whom you want the stock issued, and we will forward stock by return mail, and also send you weekly report thereafter, thus keeping you fully posted. Address

**H. H. TUCKER, JR., Secretary,  
CHERRYVALE, KANSAS.**
